

Global Network Encryption Investment Security Service

GNEISS 2nd Anniversary Update

July 7th, 2020

As A Quick Summary, We Currently Offer The Following Services:

- First Decentralized P2P free marketplace built on top of the Bitcoin and Ethereum Blockchains.
- Creation and trading of ERC20 Tokens that are registered on the platform can be traded with Bitcoin (Free Bitcoin transactions due to Lightning Network) and allows users to instantly create markets for their project. The Users tokens can be traded with Bitcoin (free transactions through LN) to any other ERC20 token that is registered on the GNEISS platform (900+ trading pairs) is this current?
- GNEISS gives the user the ability to store and trade BTC, ETH or any other ERC20 token on Ethereum's Blockchain. Store all your favorite Digital Assets in one easy but secure wallet or swap with ease in our decentralized marketplace. Defi is exploding this year, how have you prepared?

- Users can utilize GNEISS Decentralized Registry to register their Birth Certificate, Car, House, etc. on the blockchain. This allows users to access these legally binding files from anywhere in the world rather than depend on a safety deposit box or fire safe (Untrustworthy 3rd Party)
- Birth, death, marriage certificates. No more need to have a deposit box or fire safe to securely store your Legal Certificates.
- Register car, house, boat, spaceship or “other” registration to register anything you want. Easily recognizable Legal paperwork to prove your ownership in the court of law, securely accessed from any internet source.
- Match your Birth Certificate with Tier 2 GNEISS verification for globally recognized identification
- Free Marketplace - we’ve opened up free trade to the world through the use of our decentralized free marketplace that has the most advanced computer and network security on the planet.
- GNEISS provides a trustless Peer to Peer system where everyone has equal access to all free-market and government registry functions - Only requirement is an internet connection.

Things We’ve Recently Accomplished:

- Finished trading page - Updated Logos for each coin and descriptions for each coin, market-making order books (small to medium) and charts have been updated for a more fresh look.
- Finished Registration pages - Fixed major and sub categories so that GNEISS can register any physical asset on the planet. (Precious metals, Real Estate, Moon)
- Finished Raiden Network - instant, nearly-free transactions (pay once upon closing) for Ethereum or any ERC20 token
- Integrated hundreds more ERC20 tokens - Over doubled our initial trading capacity, now with over 900 of your favorite cryptos all in one easy to use location

- Have integrated liquidity and trading bots - small to medium sized liquidity for your every-day traders

Things To Expect In The Future:

- Networking Tab “Whatsat” - encrypted messenger with a twitter-like social media
- Additional smart contract features: Multisig Wallets, DAOs, Airdrop, Voting, Swap, Betting, BTC & ETH block inscription
- Completion of the GNEISS node app - if anyone wants to run a node contact us privately because we can do it manually today but 2 months until automatic deployment
- Finished GNEISS app for iOS and Android - trade, monitor your favorite cryptos, manage your wallet (deposit/withdraw)
- Registered Items Marketplace - Registration for every item on the planet, peer to peer digital marketplace. (Token Bazaar)
- Loans & Credit Score - Instant p2p loans with any coin on the platform.
- Integrate Litecoin, Dogecoin, Monero, Dash, and DigiByte wallets into GNEISS platform (Let us know your favorites)
- Upgrade Litecoin wallet with Lightning Network and the rest of the altcoins with their respective upgrades
- We aim to be the most advanced Fintech security service while providing the public alternatives to existing government registration and banking services.
- Derivatives Futures Smart Contracts - quarterly futures contracts, Year 1, 3 and 5 - Investment vehicles pegged 1-1 with Bitcoin Futures, we set the markets and pay you out the difference. {Must have FULL collateral} - (eta 7/4/21)
- Derivatives Options Smart Contracts - Quarterly Futures Investment Vehicle (1, 3, 5 yrs) {Must have FULL collateral} - (eta 7/4/21)
- Insurance Smart Contracts - {Must have FULL collateral} - A whole - life insurance or item insurance for anything registered on GNEISS (eta 7/4/22)
